

Hello Mark!! We love the product and it has helped Jameson tremendously! My son is classified as mild so we don't have lots of blisters but we do have a fair amount of redness on his knuckles, let me rephrase that we DID have a fair amount of redness, his skin now looks beautiful, the ONLY product we use is Alwyn, so there's no doubt in my mind, this product is amazing, it works, and it works for EB! I would also like to tell you that my family has a history of dry, cracked, chapped hands especially in the winter and Alwyn works wonders for this too! We love your product, again, it's the only product we use on my son's skin!! I am close to running out of samples and would like to know where/how to purchase the product! I honestly don't think you let people down, you have been a blessing to the EB community and extremely generous! A big Texas sized thank-you- Jennifer
